

Expert advice

Providing independent and strategic advice to the NSW Government to make sure NSW gets the infrastructure it needs.

To ensure infrastructure investment decisions are informed by robust assessment, independent assurance and long term planning, we prepare the State Infrastructure Strategy every five years. This is a 20-year infrastructure investment plan for the NSW Government.

We also: compile the annual Five Year Infrastructure Plan, which identifies major infrastructure projects to be undertaken as a priority; provide specialist advice to the NSW Government on specific infrastructure initiatives by government agencies or the private sector; and facilitate the State's engagement with the Infrastructure Australia to ensure alignment of infrastructure priorities.

Project assurance

Monitoring NSW's infrastructure program to keep it on track and deliver outstanding results to the community.

We carry out expert and independent reviews of projects throughout their planning and delivery to help NSW Government delivery agencies to ensure the State's infrastructure projects are being effectively developed and delivered on time, on budget and in accordance with the NSW Government's objectives.

We provide oversight and transparency to the NSW Government on the infrastructure program through the implementation of the Infrastructure Investor Assurance Framework. This is a tiered, risk-based approach to investor assurance for capital projects.

Restart NSW

Boosting the economic growth and productivity of the state through targeted investment in infrastructure projects.

The Restart NSW fund is the government's dedicated infrastructure fund, supporting both major government-led projects and local and community infrastructure projects across metropolitan and regional NSW.

We have sole responsibility for recommending infrastructure projects to the NSW Treasurer for funding from the Restart NSW fund, ensuring all projects improve the economic growth and productivity of NSW. This includes an independent assessment process for all local and community infrastructure projects, with ongoing project management by way of a funding deed with those funding recipients.

Projects NSW

Turning world-class plans into world-class projects through a specialist unit in complex project delivery.

We manage the procurement and delivery of nominated priority projects to ensure world-class infrastructure for our NSW community.

Projects we are managing include the recently completed transformation of Darling Harbour including the world-class International Convention Centre, a new correctional centre in Grafton, new sporting stadia in Western Sydney and Moore Park, the upgrade of the Anzac Memorial in Hyde Park and the redevelopment of the Walsh Bay Arts Precinct.
